

21. Write a Java method to find the smallest number among three numbers.

Test Data:

Input the first number: 25

Input the Second number: 37

Input the third number: 29

Expected Output:

The smallest value is 25.0

```
import java.util.Scanner;
public class Exercise21 {

    public static void main(String[] args) {

        System.out.println("Input the first number");
        Scanner scanner = new Scanner(System.in);
        int a = scanner.nextInt();
        System.out.println("Input the second number");
        int b = scanner.nextInt();
        System.out.println("Input the third number");
        int c = scanner.nextInt();

        if (a<b & b>c & a<b)
        {
            System.out.println("the smallest value is" + a);
        }

    }
}
```
