

14. Java program to find the average of 5 numbers using a while loop

Enter an integer:

6

Enter an integer:

2

Enter an integer:

5

Enter an integer:

7

Enter an integer:

9

Average is: 5.8

```
import java.util.Scanner;
public class Exercise14 {

    public static void main(String[] args) {
        System.out.println("Enter an integer");
        Scanner scanner = new Scanner(System.in);
        double sum = 0;
        double count = 0;

        while (count < 5)
        {
            int num = scanner.nextInt();
            sum += num;
            count ++;
        }
        double Average = sum / count;

        System.out.println("Average is" + Average);
    }
}
```
