

34. Write a Java program to create a class called Vehicle with a method called drive(). Create a subclass called Car that overrides the drive() method to print "Repairing a car".

Sample Output:

Repairing a vehicle

Repairing a car

```
class Vehicle {  
    public void drive() {  
        System.out.println("Repairing a vehicle");  
    }  
}  
  
class Car extends Vehicle {  
    public void drive() {  
        System.out.println("Repairing a car");  
    }  
}  
  
public class Exercise34 {  
    public static void main(String[] args) {  
        Vehicle vehicle = new Vehicle();  
        vehicle.drive();  
  
        Car car = new Car();  
        car.drive();  
    }  
}
```
