

2. Write a Java program to print the sum (addition), multiply, subtract, divide and remainder of two numbers.

Test Data:

Input first number: 125

Input second number: 24

Expected Output :

125 + 24 = 149

125 - 24 = 101

125 x 24 = 3000

125 / 24 = 5

125 mod 24 = 5

```
import java.util.Scanner;
public class Exercise2 {

    public static void main(String[] args) {
        Scanner scnr = new Scanner(System.in);
        System.out.println("Input first number");
        int a = scnr.nextInt();
        System.out.println("Input second number");
        int b = scnr.nextInt();

        System.out.println("Addition is" + (a+b));
        System.out.println("Multiplication is " + (a*b));
        System.out.println("Substraction is " + (a-b));
        System.out.println("Division is " + (a/b));
        System.out.println("Reminder of two number is" + " " + (a%b));
    }
}
```
