1. Write a Java program that takes two numbers as input and displays the product of two numbers.
Test Data:
Input first number: 25
Input second number: 5
Expected Output :
25 x 5 = 125

```java
import java.util.Scanner;
public class Exercise1 {

    public static void main(String[] args) {
        Scanner scnr = new Scanner(System.in);
        System.out.println("Input first number");
        int a = scnr.nextInt();
        System.out.println("Input second number");
        int b = scnr.nextInt();
        System.out.println("product of two number"+(a*b));
    }
}
```
